INTRODUCTION

INTRODUCTION

Market capitalization in billion U.S. dollars

Cryptocurrencies are gaining rapid global dominance with each progressive year and have established a hefty Market Cap of 2.28 Trillion within just a decade of their inception. Cryptos exhibit extremely bullish price action with high-risk higher-profit factor that's attracting conventional Traders and Investors to switch from Institutional markets, securities and exchanges to explore lucrative opportunities viable in this domain. These virtual currencies are expected to become as ubiquitous as Fiat currencies in near future, indicating an expeditiously massive mainstream adoption of inherent technology and currency sooner than expected.

Despite their increasing popularity and exalted merits, Virtual currencies face some major key challenges. From paradoxical villainification to extensive government scrutiny, architectural complexity and raising security and environmental concerns, digital assets have a long road ahead before their mainstream adoption can be supplemented. CyCOIN premise is extensively assessed and built in a manner that allies with constitutional merits of revolutionary Blockchain technology for creation of a succinct virtual asset ecosystem that seamlessly collates with governmental authentication covenants, environmentally tenable protocols, alongside acute focus on user safety and anonymity without compromising vital global seemliness.

EXECUTIVE SUMMARY

FOUNDERS' PROFILE

The Management Team of CyCOIN comprises of highly sagacious visionaries whose astute sense of entrepreneurship, rising from decades long-exposure to leading industries from multiple-sectors across the Globe have led them to exploration of the booming Crypto-sphere. Being elite members of CIBA- The Cyprus International Businesses Association, CyCoin Exchange UAB Management Team actively involves Financial Investment and Wealth Management Savants who have handled a variety of High-profile portfolios covering: Fiscal Risk Assessment and Mitigation, Cash-Flow Management, Financial Forecasting, Budgeting, Insurance and Tax Planning, Accounts Inspection, CapEx Fund Regulation etc. This rich exposure has equipped CyCoin Exchange UAB Management with an uncanny ability to anticipate the ardent needs of a society or a group of people and ensure they are catered to in the most efficient manner. Incorporating seasoned Traders of Assets, Commodities and Cryptocurrencies, CyCoin Exchange UAB Management envisions delivering the most innovative and futuristic Blockchain solutions to the general populace, so everyone can equitably benefit from the growing momentum of this World famous Tech-wonder.
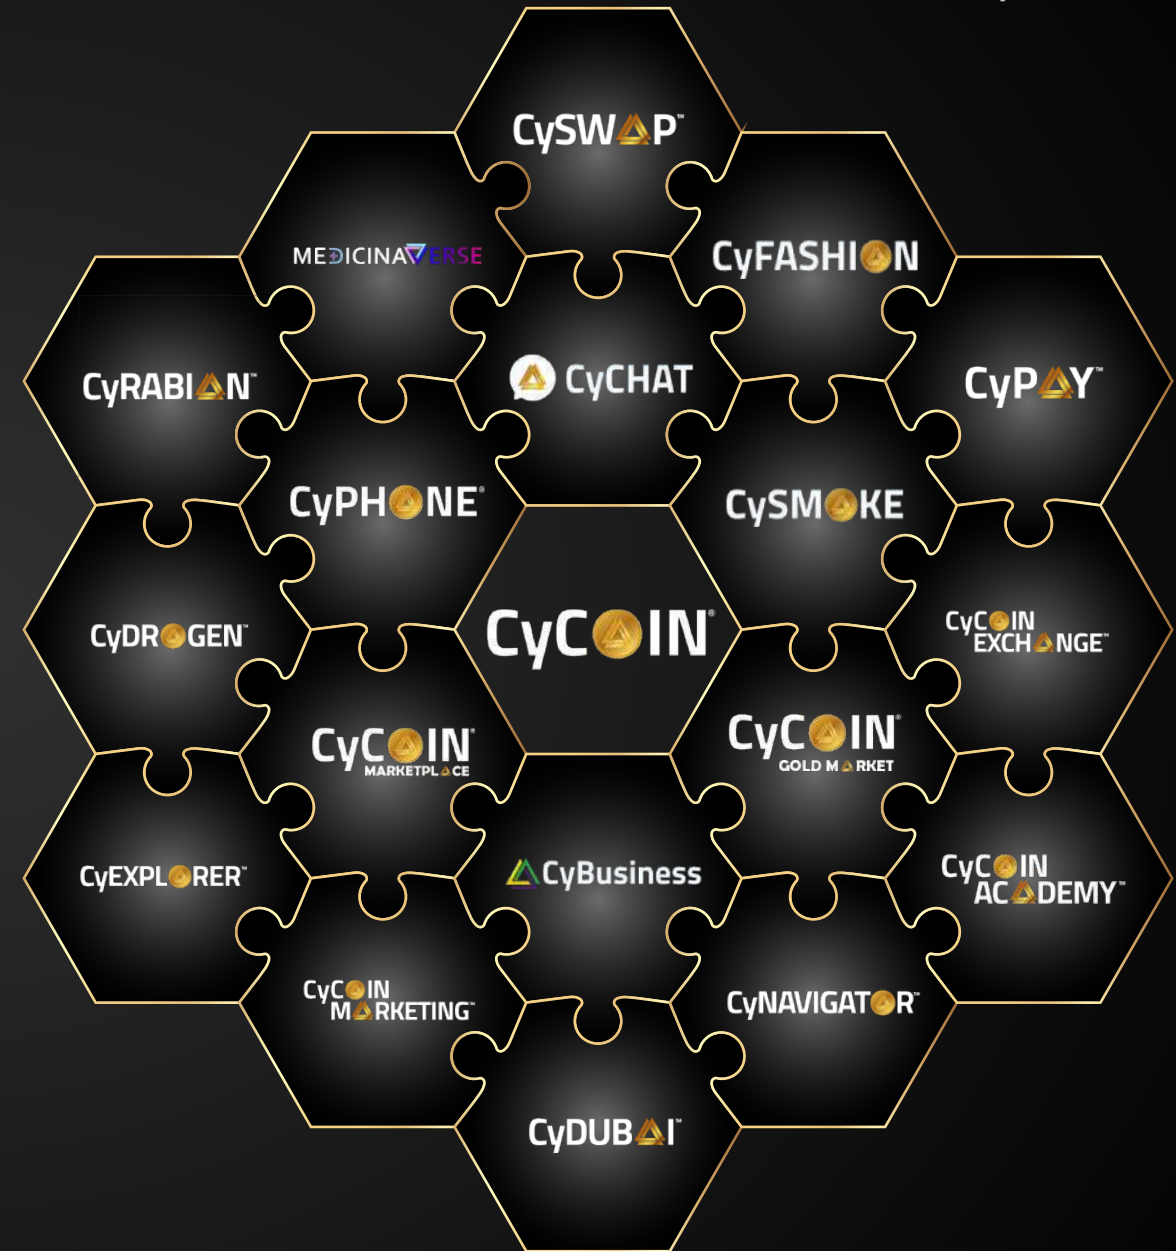

BUSINESS PROFILE

After a decade-long careful monitoring of the operations of Crypto and Blockchain Domain, the World is finally waking up to the true potential of Decentralized Virtual Asset platforms. Along with their Multifold-merits, the seasoned Operators are also realizing the bottlenecks prevailing in the mainstream Digital Asset sphere.

Setting up it's own Blockchain backed by cutting Artificial Intelligence, Data cognition and Quantum Computing- CyCOIN intends to overcome the existing hurdles of mainstream Crypto and Blockchain Domian, like: Bitcoin, Etherium, Cardano etc. Following diligent and methodical dissertation, the pedigree of CyCOIN was inaugurated that will provide a better, safer and faster alternative to establish the most futuristic Currency as a Payment method and as an option that's viable for both Man and the planet.

The nomenclature of the Project is inspired by the relationship between biological and artificial systems. The prefix "Cy" comes from "Cyber" or "Cybernetics", a word which has its roots derived from the renowned Greek language, where "κυβερνητική" (kybernētik) essentially means "governance", which later transitioned to a self-governing entity, not far from artificial intelligence. Thus, CyCOIN is a coin designed to be used as a window for supreme-modern futuristic human society, where humans will interact with artificial intelligence and robots in a most secure and versatile ecosystem, making giant cybernetic headways.

BUSINESS OVERVIEW

DESCRIPTION

CyCOIN is a coin intended to be used in the future human society, where humans will interact with artificial intelligence and robots in a very secure, economical and faster way. We aim to become world's leading Fintech Company extending cutting-edge products on Blockchain Platform for the global businesses to adopt blockchain technology.

WEBSITE

www.CyCoin.com

FORMATION YEAR

2020

VISION, MISSION & GOAL

- CyCOIN to become the safest way to invest in the future
- CyCOIN will become a widely adoptable coin, mutually benefiting all stakeholders involved
- CyCOIN will support companies globally to build their own token on its blockchain

COUNTRY OF INCORPORATION

Lithuania

STRATEGIC OBJECTIVES

- Global adoption by promoting businesses to accept CyCOIN to exchange products and services
- To minimize the hassle and unnecessary limitations of bureaucracy and build an easy-to-use, user-centric platform for mass adoption
- To provide communities with a reliable platform which is economical, fast and scalable
- Follow strict KYC / AML process
- Ease of usability

TARGET

Target Segment: Consumers with Financial portfolios
Target Market : Global

CURRENT CHALLENGES

CURRENT CHALLENGES & SCENARIOS IN CRYPTOSPHERE

The Blockchain market is exhibiting a powerful 56% compound annual growth rate (CAGR) and the global Digital Asset domain is predicting a steady upsurge of 18.3% or more in the years to come. Despite the hefty growth prospects and multifold-serviceable merits, the seasoned virtual-finance operators are coming to terms with the bottlenecks prevailing in the mainstream spheres. For example: the rise in Bitcoin's value has pleased global institutional investors and gravitated them towards the crypto-mining processes. But the crypto-currency market is highly unstable and volatile which in the long-haul makes it a terrible currency

| SLOW TRANSACTIONS | ENERGY INEFFICIENT MINING | LARGE CARBON FOOTPRINT | PRICE MANIPULATIONS | ILLEGAL TRANSACTIONS |

CURRENT CHALLENGES & SCENARIOS IN CRYPTOSPHERE

It doesn't matter how many tech-savants profess to promote it, the Cryptos like Bitcoin, are good as a speculative investment instruments, with their sole merit being that they could go up in value. But realistically, these currencies don't make up for a good medium of exchange because of their plaguing unpredictability that within a few days or weeks, their values could fluctuate too drastically, either going up sharply or come crashing down. In the long run, the 'well-known' cryptocurrencies aren't much safe for users to ally with for either utility or for investment.

Apart from unpredictability, lack of scalability is another major concern for current Blockchain networks. Current networks are capable of handling only a restricted amount of transaction data on their platforms in a given span of time, with their transaction processing capacity being limited to the average block creation time and the block size limit. This leads to increase in transaction fees of conventional platforms and delayed processing of transactions owing to network congestion that affects the overall utility, feasibility and ease of adoption of any Blockchain network.

Alongside this, the initial ruling ideology behind creation of digital currencies, such as: ability to enable instant, borderless transactions, reduced transaction fees or exchange charges has greatly been gridlocked. Digital assets domain is plagued by price manipulation tactics involving pump-and-dump, whale walling aka order book spoofing, wash trading, stop-loss hunting, leveraged derivatives, spots and standard FUDs given the unregulated and nascent nature of the sphere. Many exchanges and investment whales have engineered organized "events" in the market in order to manipulate the price movements or liquidity of the virtual currencies unscrupulously.

CURRENT CHALLENGES & SCENARIOS IN CRYPTOSPHERE

Another considerable challenge associated with current cryptocurrencies is their employment in illegal trades, potential to discreetly fund terrorist agencies, money- laundering and avoidance of capital controls. While cryprocurrencies do provide a digital and anonymous payment mechanism, popular digital currencies, say-Bitcoin has unwittingly encouraged growth of "darknet" for conduct of illicit financing and trading practices.

It's also examined that most popular Blockchain networks and cryprocurrencies are extremely energy intensive, owing to their mining protocol to support accurate verification of all transactions on the network. University of Cambridge Centre for Alternative Finance (CCAF) studies found that Bitcoin alone, has a total energy consumption that is somewhere between 400 and 445 annualized terawatt hours (TWh), while UK's electricity consumption is a little over 300 TWh a year. On top of this, the electricity required by the crypto-miners to "mine" the transactions come from extremely polluting sources, recording that about two-thirds of it is being sourced from fossil fuels. This makes these networks highly energy-reliant, leaving a heavy trail of carbon footprints in their wake. Hence, robust mining infrastructural reforms are necessary that can help support global blockchain communities rather than draining precious natural resources, and help prevent a threatening surge of greenhouse gas emissions.
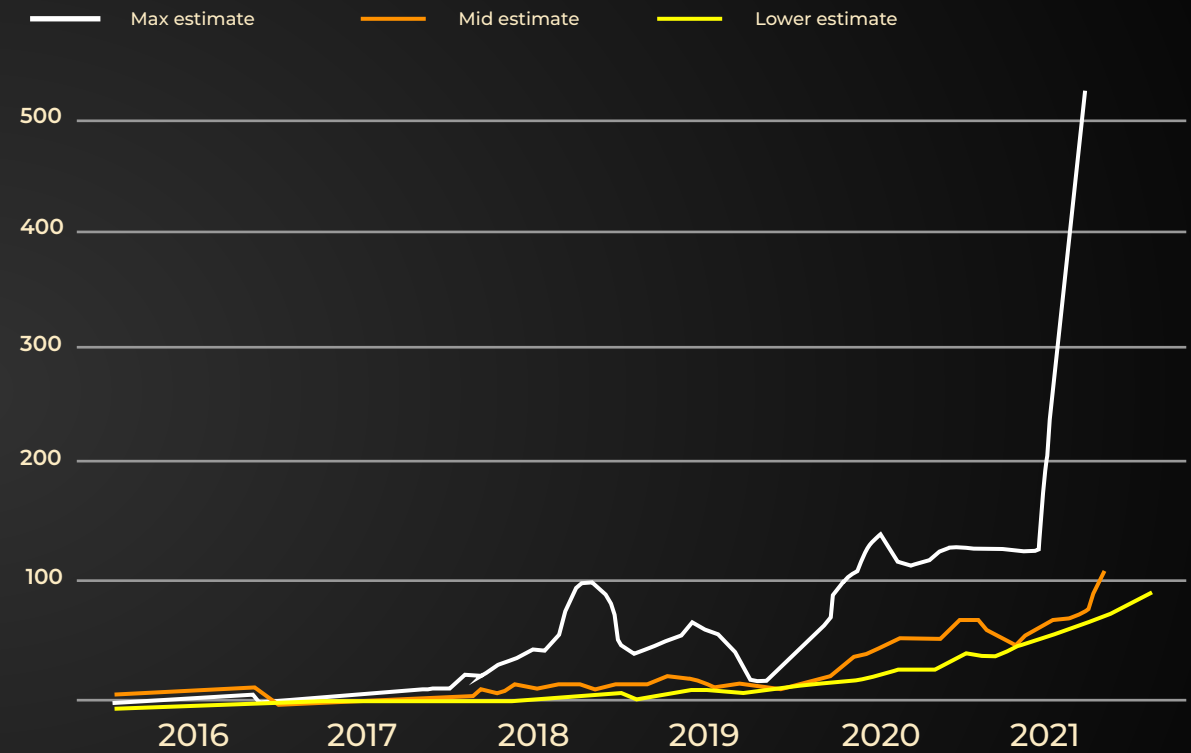

VALUE PROPOSITION

VALUE PROPOSITION

To combat the dereliction of current digital asset architectures and overcome the bottlenecks of existing Blockchain networks, Patrons of CyCOIN has joined together to create a highly advanced and easy to adapt platform that integrates all the benefits of Blockchain in alliance with avant-garde Artificial Intelligence (AI).

What is CyCOIN?

CyCOIN is a revolutionary blockchain on POA. It is a platform ecosystem that provides the most futuristic Financial Services for the World.

CyCOIN offers a conglomeration of various industries in a single platform united under the banner of AI backed CyCOIN public Blockchain that offers ease of trading in CyCOIN sanctioned innovative Projects, such as: CyChat, CyDrogen, CyBusiness, CyCOIN Exchange and MedicinaVerse; along with ability to draw upon CyCOIN's own Blockchain network for mass adoption for private projects of enterprises. CyCOIN's AI backed Public Blockchain helps overcome the drawbacks of conventional crypto and blockchain networks. Machine learning backed platforms help improve the deployment procedures and predict in advance possible system fallacies. AI aided CyCOIN Blockchain will drastically reduce the endeavors and time associated with mining and processing of encrypted information by screening multiple combinations during transaction verification.

VALUE PROPOSITION

This helps in significant reduction of computational power and energy consumption for and fortifying against network manipulations. running systems for longer durations. AI helps enhance the efficiency and programmable power of Smart Contracts by bringing to light the exploitable vulnerabilities and supporting self-adjusting reviewed conditioning before execution, thereby strengthening the security.

Why is CyCOIN one of the most powerful networks in the world?

- Because CyCOIN blockchain processes transaction 100 times faster than Ethereum and 6000 times faster than Bitcoin blockchain.

- Our transaction fees are 666 times lesser than Ethereum and 30 times cheaper than Bitcoin.

- CyCOIN's Team of 110 developers are working ceaselessly to make the transaction speeds 100 faster than the mentioned by 2023!

- We have not allowed anyone to mine coin and mint coin. Nobody - not even the CyCOIN ruler can mint coins in the future.

- This is to safeguard the interest of early supporters who can benefit with the price increase of CyCOIN with no mining and mintingin place.

- The 18 blockchain projects of CyCOIN will sustain the power and utility of the coin and the aim is to be used in all industrial & financial sectors as a primary mode of payment.

- We create powerful and innovative projects that will change the way many sectors operate their businesses now.

WHY CYCOIN BLOCKCHAIN

Fraud Prevention

Time stamp and Originality hash ensures that the fraudulent degrees are identified and eradicated from the nation

Highest Data Security

Data kept on blockchain is practically un-hackable and most reliable

Data Encryption

Since the data is saved in encrypted format, only right personnel would be able to check the details of degree

Easy & Low Cost Adoption

Blockchain based hashing allows us to make the process simple, yet robust and 100% reliable. It will also reduce the operational costs.

CYCOIN GLOBAL PROJECTS

PROJECT NUMBER: 1

CySwap

Swap, Trade, Earn and Build on the leading decentralized crypto trading protocol. The CyCoin Swap Protocol is a public entity owned and governed by all-inclusive CyCoin holders. Designed with simplicity, speed, affordability and security in mind, CyCoin SWAP allows users to diversifies market offerings & make increasing gains.

A lite exchange with lowest fees where people can earn money by funding the liquidity pool, staking CyCOIN and develop new projects.

PROJECT NUMBER: 2

CyExplorer

CyExplorer is the first platform to scan, index and list tokens created on the CyCOIN blockchain. Everyone who wants to have its own crypto token can do this with no programming knowledge and experience, as simple as creating an social media profile using the CyExplorer Platform.

People can create their own economy using their token as an alternative payment and build a business around it. For free.

That will make CyCOIN increase the price considerable by multiplying the transactions in the blockchain.

Also, CyExplorer manages all the smart contracts issued on the blockchain, it gathers and lists network statistics and information about the latest blocks and transactionsinside the CyCOIN blockchain.

PROJECT NUMBER: 3

CyCOIN Exchange

CyCOIN Exchange: It's one of the most secure and fastest crypto exchange platform that are functional across the world. Backed by a consortium of Artificial intelligence, CyCOIN's own Blockchain network and streamlined security attributes, it will be impossible to get breached. CyCOIN Exchange targets extension of the most seamless and fortified user experience to promote large-scale digital asset operations.

CyCOIN Exchange is a POA and AI based platforms that are functional that furthers the ideals of interoperability, decentralization and infrastructural transparency throughout the CyCOIN ecosystem.

CyCOIN Exchange is designed to overcome the hindrances of current day Digital asset exchanges, such as: scalability, security, network congestion, high gas costs and poor accountability.

PROJECT NUMBER: 3

CyCOIN's Digital Assets Exchange amalgamates cutting-edge PoA protocol that helps scale transactions on the CyCOIN Exchange Platform substantially, alongside ensuring that users can implement fast, low-cost, easily accessible decentralized mechanisms for their own Projects (Dapps) using CyCOIN's PoA-backed personalized Blockchain network for mass adoption of Blockchain.

Using the Proof of Authority consensus model in CyCOIN Exchange, the validators stake their identity in exchange for validating blocks, in turn allowing users to maintain a fixed block generation time. Transactions from one wallet to another are extremely fast. Alongside this, through the use of interoperability and interledger protocols, resource-intensive transactions are shifted over to the secondary blockchain running simultaneously for better interaction and transfer of value, which helps to eliminate network congestion drastically.

AI lends hand to PoA protocol side by side on CyCOIN Exchange. Employing various spectrums of machine learning for statistical analysis, regression analysis, deep learning and risk scanning, AI assists CyCOIN Exchange platform to enhance inviolability and significantly reduce repercussions resulting from cyber breaches. Besides this, CyCOIN Exchange leverages payloads, attack types and endpoints using AI to constantly verify and prioritize threats, determine their risk profiles, foster fraud detection and AML measures for amplified transparency and integrity of the CyCOIN Exchange platform. CyCOIN is set to become the great crypto-equalizer in the World.

This will be the biggest exchange platform in the world. With more than 6000 cryptocurrencies.

Now you can earn money by staking, funding, trading and learning through our platform. The exchange has the lowest fees in the world.

PROJECT NUMBER: 4

CyPay

CyPay is a new, state-of-the-art, money transfer service that will work on CyCoin Blockchain and Infrastructure, that allows users to send payments to family and friends at a very low cost, way more affordable than typical remittance providers. The classic, best known, money transfer services like Western Union and Moneygram have many disadvantages for the end user:

◆ They have a very long processing time, around 1 to 4 days.

◆ The cost of international transfer is quite huge, over 5% from the transferred amount.

◆ There are also high fixed feed, disregarding the transferred amount.

◆ They need in-person withdrawals and have limited online options

MONEY TRANSFER

PROJECT NUMBER: 4

Taking these into account, the CyPay services deal with all of these disadvantages, because it can provide its users with secure and instantaneous transactions with a fee lower than 1%, regardless of the amount transferred.

CyPay provides also the following advantages:

All transactions are sent automatically and received instantly.

Truly secured transactions that are made using the CyCoin Blockchain.

Anonymous transactions.

No minimum or maximum limits for transactions.

PROJECT NUMBER: 4

By using CyPay money transfer service, you can rest assured that the security of the transactions are at the very highest level, because CyCoin Blockchain ensures the following:

Fraud prevention :

Time stamp and Originality hash ensures that the fraudulent undertakings are screened, identified and eradicated promptly.

Highest Data Security :

Enhanced cyber security and data integrity via user-centric permissioned consensus & AI powered smart contracts.

Data Encryption :

Blockchain & AI enhance implementation of cryptography and hashing to provide a secure environment to its users, and prevents sensitive information from being misused or forged.

CyPay is a new money transfer service that will work on CyCOIN blockchain and infrastructure, that allows users to send payments to family and friends at a very low cost, way more affordable than typical remittance providers, at an astonishing transaction speed, less than 1 second per transaction. Other advantages of CyPay include fraud prevention, highest data security and data encryption.

PROJECT NUMBER: 5

CyChat

CyChat is a state-of-the-art, global chat application in which all the interactions, messages and files transferred between the users will be encrypted and decentralized, capitalizing strongly on the all-inclusive benefits and security of the CyCOIN's most advanced blockchain. It entails the following key features:

- Real Time Chat Module
- Multilingual
- Provably secure
- Customizable notifications
- Multi-device synchronization
- Single Sign-On (SSO) or Multi-Factor Authentication (MFA)
- Peer-2-Peer encryption
- Organized locally stored messaging

PROJECT NUMBER: 5

- Encrypted Group Chat/New Chat from Contacts
- Broadcasting feature
- Standard options, like: Pining, Deleting, Archiving, Muting, Unread tags, View, Select etc
- Search Mode
- Exchanging multi-media
- Location & Data forwarding
- CyCHAT in-built reactions and threads

- CyCHAT themes, animation and interactive emoticons
- CyCHAT User Authentication
- Supports sustainable and inclusive communities
- Easily accessible cross platform support
- External app integrations & upgrades

CyChat is a state-of-the-art, global chat application in which all the interactions, messages and files transferred between the users will be encrypted and decentralized, capitalizing strongly on the all-inclusive benefits and security of the CyCOIN's most advanced blockchain. CyChat even has blockchain-based peer-2-peer encryption for all the messages, even if they are individual or group messages. Privacy again for people! Our target is 100 millions users in Q4 of 2024.

PROJECT NUMBER: 6

CyBusiness

Being one of the most important CyCOIN projects, CyBusiness will start as a social network and real-time news platform for business people all around the world. The social network will have specific, advanced features dedicated only to CyCOIN holders and investors. Full access to most profitable investments in the world, shared by other business individuals. In the following years, CyBusiness will also develop a chain of hotels, cafeterias and shops dedicated to CyCOIN holders, business people, and entities interested in raising the scale of their business operations to become number 1 worldwide.

PROJECT NUMBER: 7

CyFashion

The brand of clothes that are made from some of the world's most delicate textiles, which have a lot of benefits for your skin. These clothes are anti-allergenic and contain carefully selected fibers that are friendly even with the most sensitive skin. From underwear to jackets, from trousers to tshirts, CyFashion is the fashion brand that you will want to wear every day.

Social network with NFT system integrated

CyFashion will be a fashion social network for wearable luxury brands. Working with all the luxury brands as an aggregator and marketplace for all the brands, whether: Physical or Virtual. CyFashion streamlines the supply chain along with the AI optimizing the visual exploration of the fashion collections. Primary payment system on the platform will be CyCOIN.

PROJECT NUMBER: 8

CyDubai

The CyDubai project is focused on multiple fields: first of all, CyDubai will be the biggest real estate platform in Dubai and, secondly, CyDubai properties is your trustful partner for real estate construction and investments in Dubai.

CyDubai allows CyCOIN staking holders to fund the real estate projects earning maximum profits of the developments.

One of the most ambitious CyCOIN project for people:

6 CyDubai towers

They will be called crypto towers and everything will be on smart and AI technology.

CyDubai also supports fractional ownership of Dubai-based properties as long term profitable ventures and buying or selling of properties using NFTS.

PROJECT NUMBER: 9

CyCOIN Gold Market

CyCoin Gold Market is now in the market using CyCoin Gold Coins for investments and allow for a mass use for both people and organizations. Interest rates remain low, meaning that your money in the bank "earns virtually nothing". When you account for inflation, that cash may have actually lost value. CyCoin Gold Coins is recognized as having a long term record of stability & great returns.

This is the place where CyCOIN holders have full access to our global gold market and can buy or exchange CyCOINs to real gold coins and also get various CyCOIN gold products like luxury watches or golden rings. Being far more efficient than cash at storing wealth, CyCOIN gold coins are recognized as having a long-term record of stability, because they are protected from inflation and low interest rates.

PROJECT NUMBER: 10

CyCOIN Marketplace

CyCOIN Marketplace is the place where you can buy or sell almost anything, from cars, apartments, phones, laptops, to even yachts or planes, with payment only in CyCoin. Here, you can find only rigorously verified listings and sale offers, because security is a key aspect for us and we work with internationally prestigious companies for our KYC (Know Your Customer) policy. CyCoin Marketplace will leverage blockchain technology to ensure that transactions are secure and safe for all participants. This technology revolves around decentralized data storage that can record transactions between parties in an efficient, trustless, and immutable manner. With CyCoin, users will be able to spend the native coin across the CyCoin Marketplace and allied ecosystems.
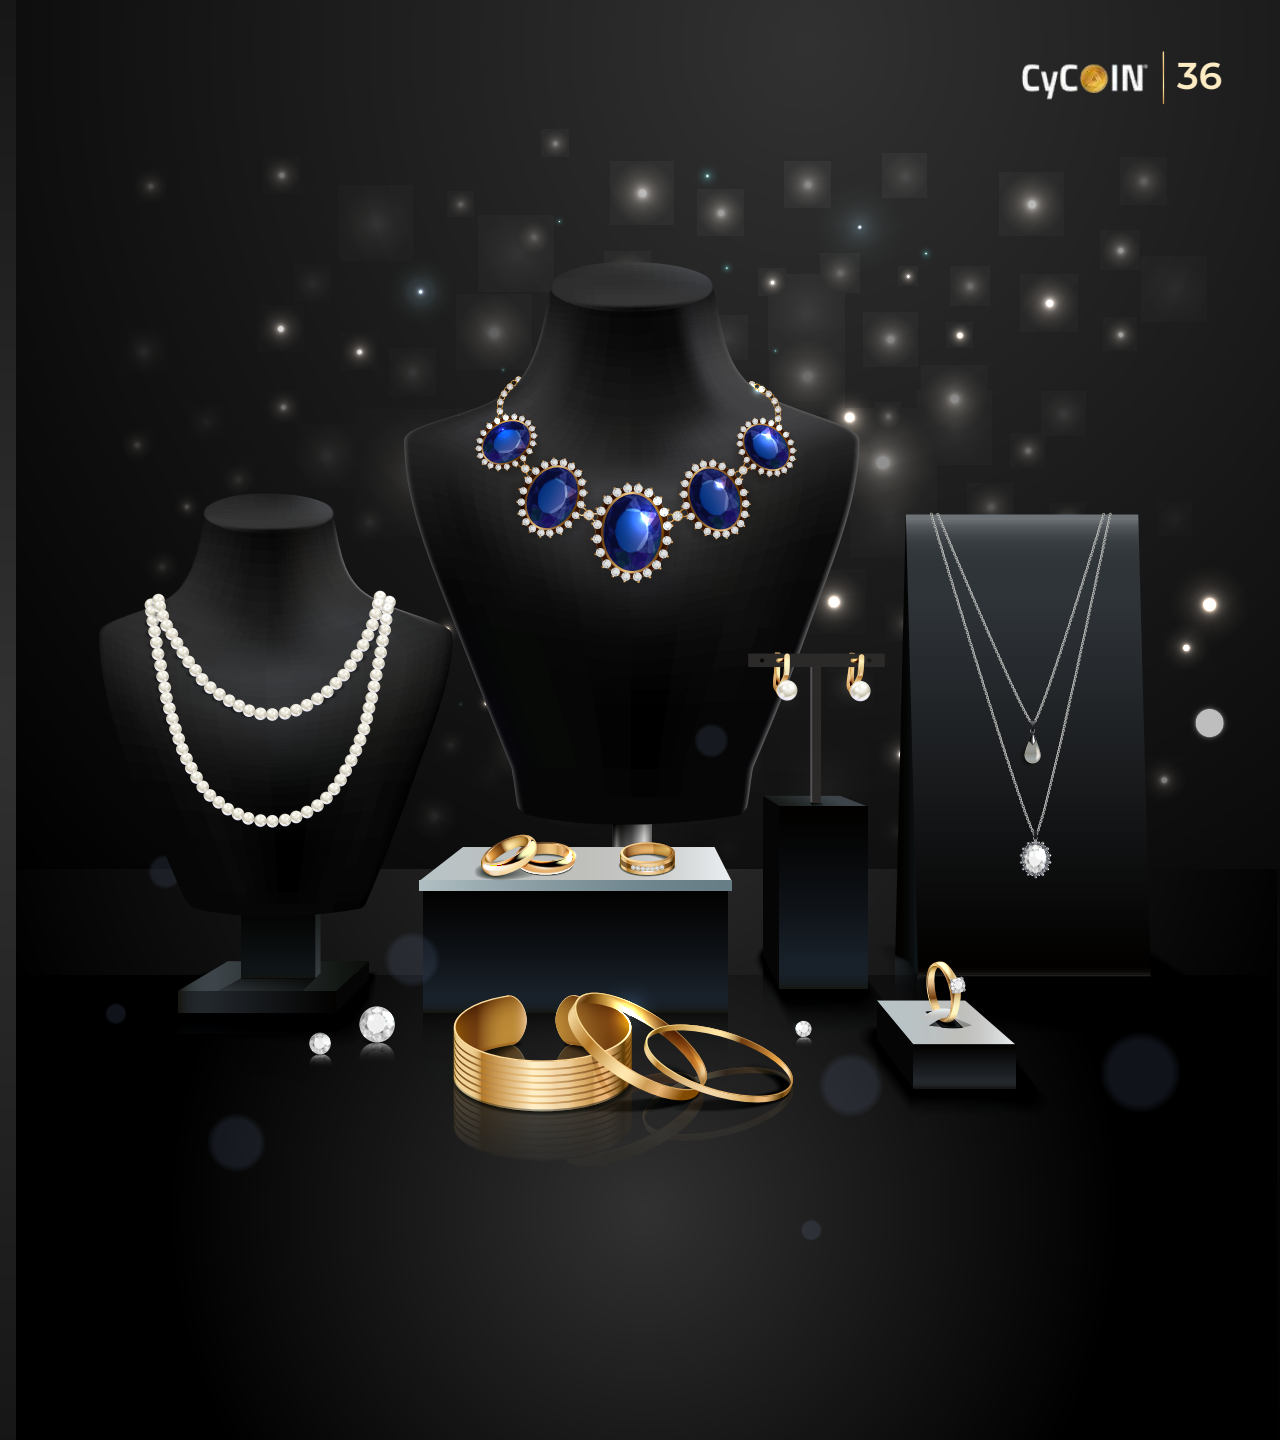

PROJECT NUMBER: 10

You can join the CyCoin Marketplace as a buyer and also as a seller. We accept a very wide range of goods and services to be sold using our CyCoin Marketplace, such as:

- Cars
- Real estate
- Watches
- Digital assets
- Electronic devices
- Electronic appliances

- Fashion items
- Luxury items
- Luxury means of transport (planes, yachts)
- Services
- And many more!

PROJECT NUMBER: 11

CyRabian

CyRabian is the newest Arabian brand of exquisite, high-quality fragrances , fashion and jewellery in Dubai and works on franchise system, that are ideal for most countries and that will work only on payments through CyCOIN blockchain. Having a rich collection of perfumes, fashion and jewellery, CyRabian will become one of the most luxury brand in the world. People can invest CyCOIN in this project and earn profit from the system.

PROJECT NUMBER: 12

CyDrogen

It introduces first of its kind beverage in the World that contains monoatomic gold and is tradeable via virtual currencies and will be promoted by selected VIPs from across the World.

The benefits of CyDrogen drink is to avail benefits of better health, youthfulness and improved brain functions, becoming more intelligent and active. It's actually the best improved water using monoatomic gold for stress relief. It can be used by any person for any age. It will be aired via TV commercials around the Globe and will be available for consumption Worldwide.

First of its kind beverage in the world that contains monoatomic gold and is tradeable via virtual currencies and will be promoted by selected VIPs from across the world. and will increase the number of transactions on CyCOIN blockchain.

PROJECT NUMBER: 13

CySmoke

The smoking device of the future, that gives you the opportunity to smoke in a healthy manner. This is the first "cigarette" that has no negative impacts for your health. It doesn't generate harmful smoke and does not release toxic particles into the atmosphere, so it is safe to smoke even if you have a newborn in your room.

This smoking device will be the only one in the world that gives you the opportunity to smoke in a healthy manner. This is the first "natural cigarette item" that has no negative impacts for your health. It doesn't generate harmful smoke and does not release toxic particles into the atmosphere, so it is safe to smoke even if you have a newborn in your room. Based on specific Chinese herbs it will be released very soon to the public.

PROJECT NUMBER: 14

CyPhone

CyPhone is the telecommunication device of the Future. First Crypto Phone driven by powerful Blockchain technology that supports inbuilt crypto Apps and seamless integration of blockchain applications with the phone's hardware for secure private calls, breaking the obsolete tyranny of current day centralized mobile carriers that dilutes control and ownership.

This will be the Smartphone of the future, a new mobile device that allows conventional communication but also holographic projection meetings and calls. Based on the CyCOIN infrastructure for artificial intelligence and having state-of-the-art physical properties that makes it indestructible, CyPhone will quickly become the most used mobile device in the world by 2030. It will also be the first Smartphone inbuilt with secured digital payments, crypto app and private calls, using blockchain & AI technology.

PROJECT NUMBER: 15

CyNavigator

CyNavigator is a revolutionary blockchain based project where you are safe while navigating with the power of blockchain. With CyNavigator app, get the correct track record of driver for the safety and security of your family, live information about the traffic, best route to choose and an option to pay conveniently with your favorite crypto currency.

PROJECT NUMBER: 16

Medicinaverse

The future of healthcare is right in front of you! Medicinaverse is using artificial intelligence and the newest virtual reality and augmented reality technology to help people find cures for their diseases, to scan their bodies and find signs of future, otherwise undetectable health problems, enabling them to prevent illness.

PROJECT NUMBER: 17

CyCOIN PR for Partners

CyCOIN PR a team dedicated to Global Crypto Marketing. As technology continuously changes, the rules in marketing are also adapting to the new challenges. Luckily, CyCOIN PR is always adapting very fast, because our team is constantly learning, meanwhile adjusting and improving our marketing strategies to get the best results for CyCoin advertising and PR, and also for our clients.

CyCOIN PR team is focused on blockchain technology marketing, decentralized finance, NFTs and other crypto related goods and services, thus the success of the marketing campaigns for CyCoin and other clients is assured.

We have great experience in development and implementation of successful marketing and PR campaigns and we put in all our knowledge, experience and also a huge budget for the success of the CyCoin brand, in order to become no. 1 cryptocurrency in the world by 2030.

PROJECT NUMBER: 17

Our main services are as follows:

Crypto Marketing

>> Google & Facebook Ads
>> Campaign strategy

>> TikTok & LinkedIn Ads
>> Content creation

>> Social media marketing
>> Strategy implementation

>> Influencer marketing

Branding

>> UI/UX
>> Logo design

>> Website and app development
>> Brand identity

Public Relations

>> Press releases
>> Co-branding

>> Articles and Blogs
>> Target markets

Our defining numbers:

● 8+ years of experience
● 6000+ successful campaigns

● 50+ active clients
● 2+ billion $ worth ads

PROJECT NUMBER: 18

CyCOIN Academy

A Complete Cryptocurrency & Blockchain Course

- **GET YOUR CYCOIN ACADEMY CERTIFICATION!**

  CyCoin Academy gives you the opportunity to learn absolutely everything you need to know about crypto, blockchain technology and investments in the crypto market.

- **CYCOIN ACADEMY OFFERS A COMPREHENSIVE COURSE THAT IS DIVIDED INTO 4 MAIN CHAPTERS:**

  1. Cryptocurrencies
  2. Blockchain Technology
  3. Investment in Crypto Market
  4. Trading Crypto

COURSE CHARACTERISTICS:

➤ Language: English
➤ Course schedule: Self-paced (learn at your own pace)
➤ Estimated time needed to complete: 40 hours
➤ Start date: Sep 3, 2022
➤ Course & Exam type: Online
➤ Certification validity: Lifetime

COURSE DESCRIPTION:

This course is created by the founders of the CyCoin Project, with the help of some of the best teachers and professionals in the crypto and blockchain technology field. The course provides a comprehensive and in-depth overview of the fundamental concepts of crypto technology, with a particular emphasis on investments and wealth management based on cryptocurrencies.

The CyCoin Academy course covers basic properties of cryptocurrencies, the technology behind them and the means of trading and investing into crypto. You'll also learn about practical applications of cryptocurrencies, such as wallets and mining, but we will also take a brief look at how blockchain technologies can be used outside of cryptocurrencies.

If you don't have a technical or financial background, there is absolutely no problem, because the course is intended for anyone with any background. Whether you are planning your next move as a crypto trader, data analyst, researcher, or consultant, or are just looking for an introduction to the cryptotechnology, our CyCoin Academy course will help you to begin developing the critical skills needed to future-proof your career.

After registering to the course, you will receive lifetime access to all of the course resources, including lecture videos, industry best practices for creating wealth in the highly volatile crypto world and strategies for protecting your digital assets from getting hacked. Blockchain and Cryptocurrencies are one of the most groundbreaking inventions that have come out of the world in the last 100 years, and that means there are a lot of implications that have to be considered when trading cryptocurrencies.

Therefore, the CyCoin Academy course would require a significant commitment from you to cover the course material in-depth but, even if you don't know anything yet about the crypto world, this course offers you a chance to get to learn these concepts properly and quickly. After successfully completing this course, you will know anything you need to know about cryptocurrencies, blockchain technology, smart contracts, crypto as an investment and also as a means of payment.

WHAT YOU'LL LEARN

➤ The roots of blockchain technology and cryptocurrencies

➤ The basic properties and intent of centralized/decentralized currency and an in-depth understanding of a crypto coin from the ground up, including - Identity, Transactions, Record Keeping, and Consensus

➤ The mechanics behind crypto transactions, cryptography and cryptographic hash functions, privacy, and hash commitment schemes

➤ Real-world aspects of cryptocurrencies, such as wallets, wallet mechanics, mining, transactions and governance

➤ Understanding the pros and cons of cryptocurrencies and blockchain technology

➤ How to buy and/or invest into cryptocurrencies and how to grow your wealth exponentially

➤ How to trade cryptocurrencies and how to use exchange platforms

➤ Understand what makes a great cryptocurrency as a great long term investment

➤ Understand what are the biggest mistakes new investors make in cryptocurrencies

➤ Know how to watch out for scams and managing risk

➤ Learn how to read financial charts

➤ Learn about the most important cryptocurrencies available and about the biggest exchange platforms

➤ How to get QR Code Wallets, how to use them, how to transfer money out of them

➤ How to get USB Wallets, how to use them, how to transfer money out of them

➤ Know what makes a great cryptocurrency exchange (what to look for from researching an exchange)

➤ How to create your own token and how to create a great ICO

➤ How to create a diversified cryptocurrency portfolio

➤ Understand what % of your net worth should you consider investing in cryptocurrencies? and much more!

PRIOR REQUIREMENTS

➤ Previous experience: No prior technology or cryptocurrency or finance or accounting experience is required to take this course. This course can be taken by anyone interested in learning everything about cryptocurrency.

➤ Technical requirements: In order to attend this course, you can use any device with any operating system, you should only need a browser and an active internet connection.

CYCOIN ACADEMY CERTIFICATE

Upon finishing the last lesson of the course, you can take the CyCoin Academy Exam, in order to obtain the CyCoin Academy certificate. The certification helps you establish your sound Cryptocurrency and Blockchain credentials to potential employers, academic institutions in the highly competitive environment of today's job markets, and university admissions.

Having obtained the certification, you can use it for your lifetime, and also it's important to mention that the certification is administered online so you can get all of the benefits of completing this course with the flexibility of your own time schedule.

COURSE CONTENT

➤ The Future of Money & What is Blockchain?
➤ Introduction to 10+ Cryptocurrencies (Mining, Investing and Much More)
➤ Create an Investment Portfolio of Cryptocurrencies
➤ Understand What Makes a Great Cryptocurrency as A Great Long-Term Investment
➤ Introduction to 5+ Wallets to Use to Store Your Cryptocurrencies
➤ Introduction to 5+ Exchanges to Use to Buy or Sell Cryptocurrencies

➤ Introduction to 5+ Wallets to Use to Store Your Cryptocurrencies
➤ Introduction to 5+ Exchanges to Use to Buy or Sell Cryptocurrencies
➤ Introduction to Mining & Building a Mining PC from Scratch!
➤ Cryptocurrency Investment Framework
➤ Stock Market and Crypto Market Compared
➤ Watching out for Scams and Managing Risk
➤ What Are the Biggest Mistakes New Investors Make in Cryptocurrencies?
➤ How to Identify the Next Great Cryptocurrency (What to Look For & Watch Out For)
➤ When Should You Buy or Sell a Cryptocurrency?
➤ How Do You Read Charts and Look for Buy or Sell Signals
➤ What Makes a Great Wallet (What to Look For From Researching a Wallet)
➤ Introduction to ICOs + What Makes a Great ICO (What To Look For From Researching An ICO)

- ➤ More than 100 Great Online Cryptocurrency Resources

- ➤ Risk Management & Market Psychology

- ➤ Introduction to Crypto Exchange & Trade Process

- ➤ Fundamental Analysis in Crypto Trading

- ➤ Technical Analysis in Crypto Trading

- ➤ Cryptonomics: Strategies for Crypto Trading

- ➤ Margin Trading & Lending

BUSINESS OVERVIEW MODEL

We have created a unique Cyber industry Ecosystem on blockchain, where all stakeholders can register and start using our platform for their own benefits. Our platform opens a gamut of possibilities and deals very effectively to remove the biggest problems of the industry-transaction speed, price manipulation and illegal transactions to provide a seamless low-cost platform for our community members to use easily.

Our aim is to revolutionize the global Robotics Technology Market, which is expected to reach $189.36 Billion by 2027, growing at a CAGR of 16.2%. As a business model, we will be active in key global markets – USA, Europe, China and upcoming potential markets of Asia and Australia. Our focus will be on empaneling businesses and building community on our platform in the first stage. Building trust between buyer and sellers by eradicating illegal transactions from the industry is our ultimate aim, by using the world's most secure and transparent blockchain technology.

REVENUE STREAM
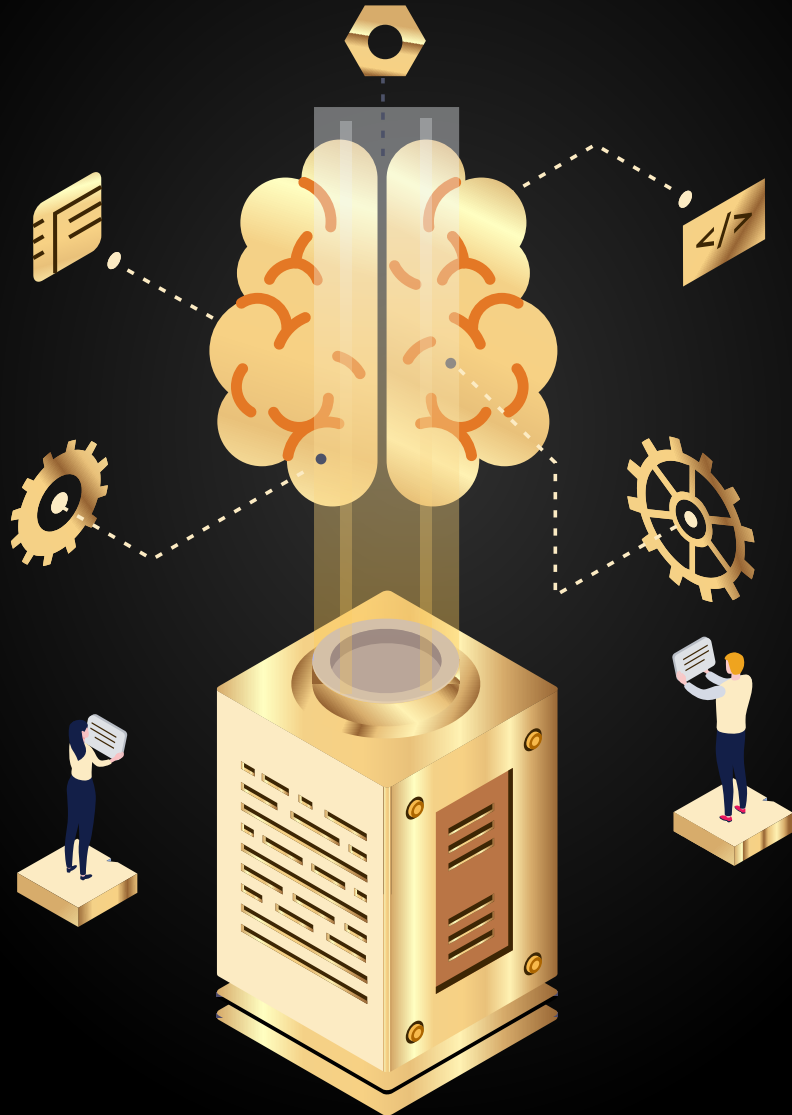

The platform will not request any commission or subscription from its users, and the access to it will be free of charge, so everyone can create an account and start trading CyCOIN. The only fees that will be paid are very small transaction fees paid when buying and selling the coin.

UNDERLYING TECHNOLOGY

We have chosen Proof of Authority (PoA) technology to eradicate most of the problems associated with the current blockchain setup of Bitcoin. In PoA-based networks, transactions and blocks are validated by approved by validators. Validators are approved authority nodes who run put transactions in blocks by an automated program.

Main advantage with PoA, is that the individuals earn the right to become validators, so there is an incentive to retain the position that they have gained. We aim to attach a reputation to identity, validators are incentivized to uphold the transaction process, as they do not wish to have their identities attached to a negative reputation.

Such a system will be much more robust than existing PoS (proof-of-stake) which does not take into consideration the total holdings, and hence the incentives are unbalanced. In addition, PoA is suited for both private networks and public networks as it requires minimal computational capacity, doesn't require specialized equipment and also yield high throughput capacity.

1. Node
2. Validator
3. Stake
4. Validator Choice
5. Transaction in block
6. Sharing in Blockchain
7. Validation

UNDERLYING TECHNOLOGY

• CyCOIN - the safest way to invest in the future. It will be the coin that will be used worldwide at a large scale in all fields.

• CyCOIN starts with a value of 6.66 dollars and the target is that in 2 years it will be worth more than 600 dollars.

• CyCOIN will never go down. Because is the system is based on investment tools that will increase the profit to everybody.

• CyCOIN will support companies globally to build their own token on its blockchain.

Business Prototype :

CyCOIN uses its own blockchain, which is safer and faster than other blockchains currently available and also relies on investment tools that almost guarantee the investors a great amount of profit in only a couple of years.

Technological Constitution :

CyCOIN's blockchain technology uses PoA (Proof of Authority) algorithm, and every transaction and block is validated by approved accounts, known as validators.

Defined Users for Platform :

All type of users are welcome to use CyCOIN's Platform, both as an investment asset, and also to create their own tokens using CyCOIN blockchain.

Suitability :

All type of users are welcome to use CyCOIN's Platform, both as an investment asset, and also to create their own tokens using CyCOIN blockchain.

KEY BENEFITS

Faster, Scalable System :

Since the validators are small, in numbers, compared to the other consensus systems, blocks and transactions can be verified with greater speed, thus creating a more scalable Blockchain system compared to the others.
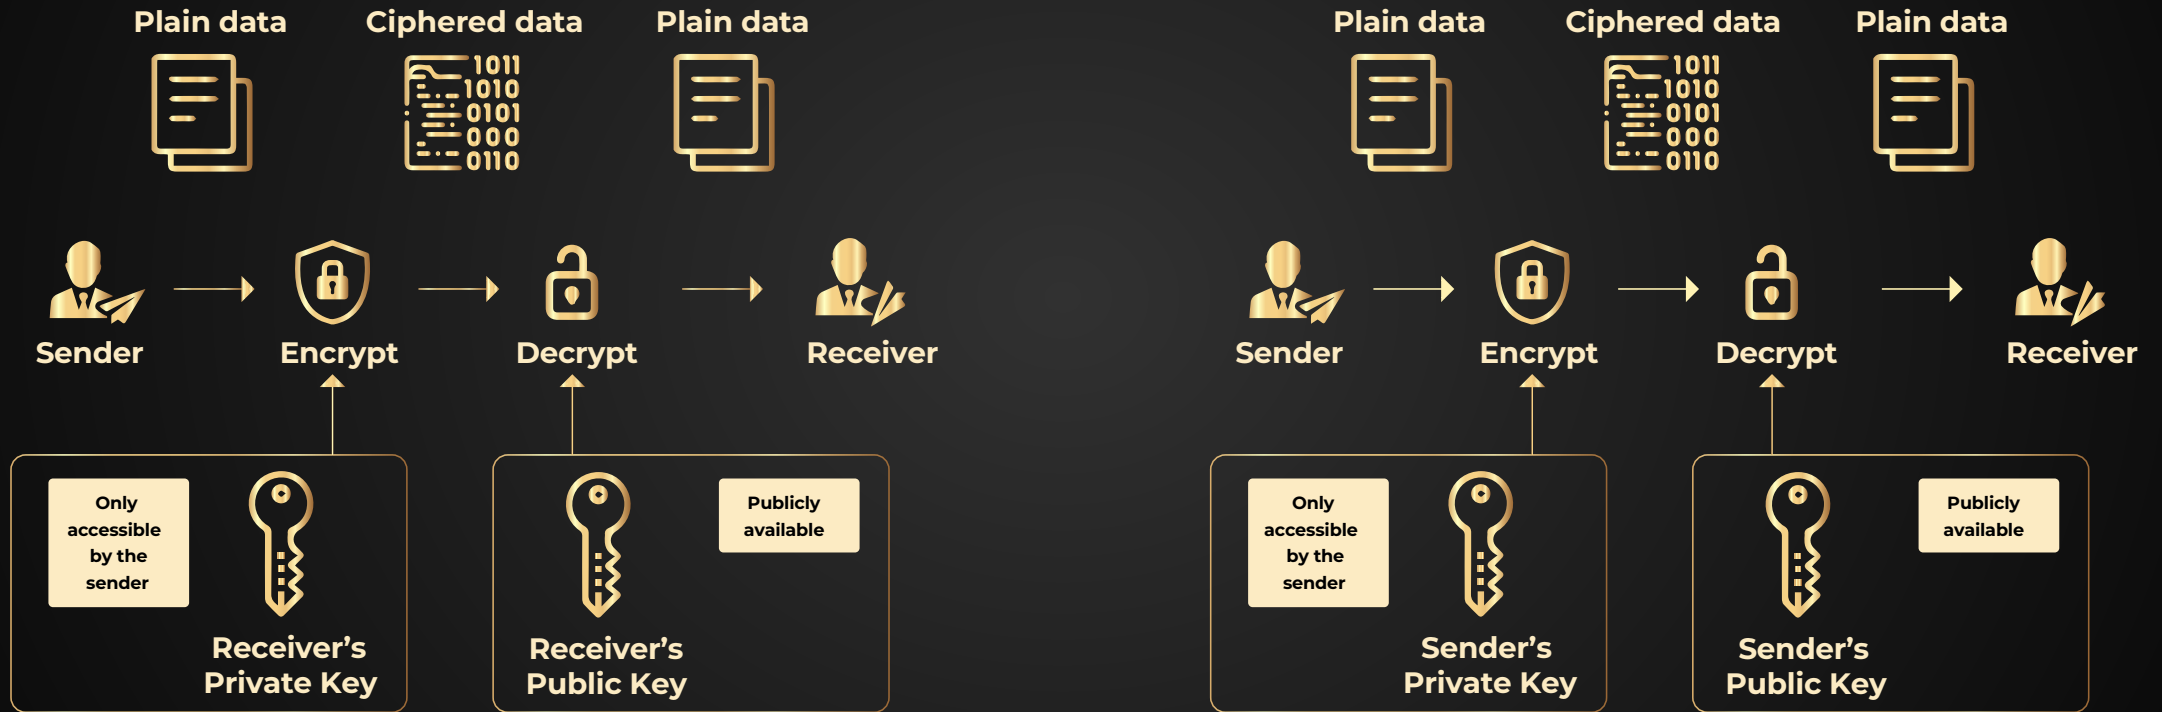

Trust & Reputation :

The "visibility" factor of the validators is seen here as a virtue: every actor who is authorized, becoming a validator of the whole process, makes his identity visible to everyone, so everyone will know it.

Anyone can therefore affect the reputation of the validator himself, if he has attempted to defraud the system. This reputation will be compromised both at the digital level (in the Blockchain circuit) and at the level of real life, since it is permanent in Blockchain.
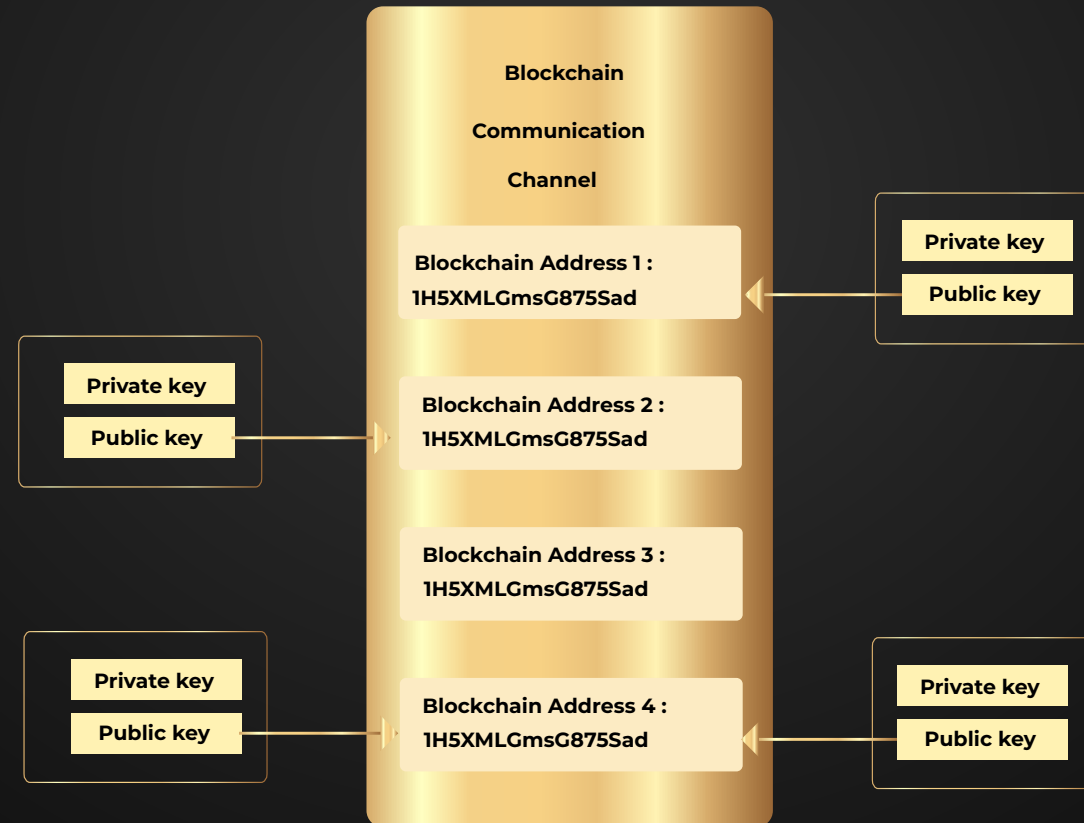

HOW WE USE THIS FOR COMMUNICATION BETWEEN BOTS

Plain data **Ciphered data** **Plain data**

Sender → **Encrypt** → **Decrypt** → **Receiver**

Only accessible by the sender

Receiver's Private Key

Publicly available

Receiver's Public Key

Public key cryptography allows robots to be sure that the content of a message can only be read by the owner of the corresponding sending address.

HOW WE USE THIS FOR COMMUNICATION BETWEEN BOTS

An Unmanned Terrestrial Vehicle (UTV) faces the problem of crossing a river bed. It creates a multisig address in which 2 of 3 keys are needed to establish the collaboration and solve the problem.

(a) Possible Solution 1: An available Unmanned Aerial Vehicle(UAV) provides its key to unlock the multisig address and retrieve the UTV position. The problem is solved by permitting the UAV to carry the UTV to the other side.

(b) Possible Solution 2: An available Unmanned Underwater Vehicle(UUV) provides its key to unlock the multisig address and retrieve the UTV's position. The action is fulfilled by letting the UUV carry the UTV to the other side.

ROADMAP

ROADMAP

Aug 20 - Jan 21
- Conception of CyCoin by its Founding Team
- Plans and Blueprints developed for CyCoin to change our Future for better.

Mar 21 - Jun 21
- Incorporation of: CyBusiness LTD company, which manages CyCoin and CyCoin Exchange UAB.
- CyCoin's own Blockchain established and running

Aug 21 - Dec 21
- CyCoin Team new vision of future projects launched
- Plans for a new Virtual World using CyCoin's Blockchain. Several platforms and products under development.

May 22 - June 22
- Initials Coin Offering starts, it will end on August 2022 CyCoin Swap is up and running
- CyCoin Gold Market Platform is opening.

Mar 22 - Apr 22
- CyFashion - The first fashion network tool inaugrates development.
- CyDubai Properties is created and starts plans and infrastructure for 6 Cyber Towers in Dubai using CyCoin - under the name: DyDubai Towers. NFTs Market for Dubai Real Estate is commenced.

Jan 22 - Feb 22
- CyCoin Wallet developed and released for use
  - -Initiation of development for CyChat Platform
  - -CySwap originates Crypto - payment solutions
  - -The Biggest CyCoin Ex-change is being created
- CyBusiness - New Business & Crypto Social Network rolled out

Jul 22 - Aug 22
- Developing beta-version of CyExplorer - First platform to index tokens using CyCoin Blockchain
- CyPay: First money transfer app on Blockchain technology

Sep 22 - Oct 22
- Launching of CyChat Secure Text Messaging - First app build on CyCoin Blockchain Technology
- The biggest Crypto Exchange in the world is created and running. Now all Cryptocurrencies in one place to trade. -Launching of CyBusiness Social Network-Beta Version.

Nov 22 - Dec 22
- Launching of CyFashion Social Network-Beta Version
- CyCoin starts implementation in Global Economy, 120 countries to be approached in CyCoin Payment Projects.

2030
- CyCoin becomes the #1 Cryptocurrency on Earth

2027 - 2028
- CyCoin becomes the alternative to payment worldwide
- CyCoin Energy Bank is created. First energy bank with full crypto sustainability for free energy system in the world. Now free energy is possible through special financial channels to supports technology and developments.

2025 - 2026
- CySmoke is ready for people to use. Advanced technology creates the first healthy cigarette.
- CyPhone is launching. New digital payments using first crypto phone

Jan 23 - 24
- CyNavigator - First of it's kind GPS on Blockchain for Cars
- CyDrogen is launching

TOKENOMICS

TOKENOMICS

● TOKEN DETAILS :

Soft Cap	Hard Cap	Total Tokens
100.000 CyCoin	3 Million CyCoin	66 Million

● UTILIZATION OF FUNDS
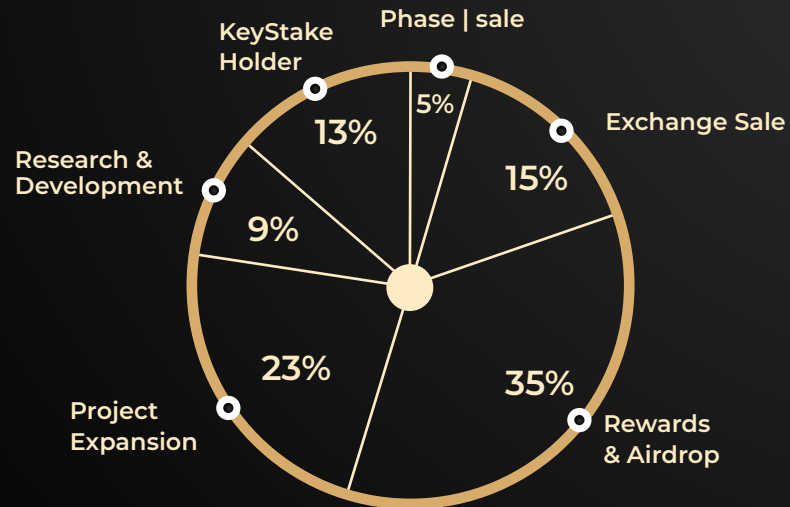

TOKEN OFFERING PHASES	
Phase I sale	3 Million
Exchange sale	10 Million
Reward & Airdrop	23 Million
Project Expansion	15 Million
Research & Development	6 Million
KeyStake Holders	9 Million

TOKENOMICS

Rewards and Airdrop Tokens: Rewards and Airdrops tokens would be issued to influencers and common public for spreading a word about CyCoin token. Detailed Rewards and Airdrop mechanism would be issued by the marketing team within the ICO period.

Research and Development: Token under this umbrella would be utilized for Research and Development on the Artificial Intelligence and other related areas for the benefit of the project.

Project Expansion: Project Expansion tokens would be utilized for expanding the projects in various geographies post launch.

Phase I Sale: These tokens would be utilized for Phase I Sale. Once the Phase I sale amount has been exhausted, users can buy the tokens from the Exchange Sale only.

Exchange Sale: These tokens would be utilized for selling directly from the exchange, once the exchange has been launched. The revenue collected from the exchange sale project would be utilized for operations and project expansion. Keystake holders: These tokens would go to the key stake holders in the project including the founder, CTO, COO, CIO, CMO and other relevant personnels.

LAUNCHING STRATEGY

LAUNCHING STRATEGY

Below mentioned marketing schemes are for reference purposes only and can be changed as per the market dynamics. We will update any such changes and detailed rules for every activity on our official website , applications & social media channels from time to time.

PRE-LAUNCH OFFERS

Invest now and get a promotional Listing price of $6.66. This ensures that early investors in our project get high RoI as soon as the token is listed on public exchanges

REFERRAL SCHEMES

To build an active community and sharing some of our profits with the community, we will be running refer and earn schemes. In the first phase, all verified users will get a referral code and link which they can share with friends. Both the referral creator and referred transactions made, in form of our free tokens.

AIRDROPS AND BOUNTY CAMPAIGNS

Apart from the above mentioned activities, from time to time we will be announcing airdrop and bounty campaigns to promote our tokens and platform for community building. Such airdrops & bounties would be time bound and there will be predefined number of tokens allocated to such campaigns. Bounties and airdrops would give an enormous bonus apart from the price discounting. For example, during the airdrop campaigns, we may offer a bonus of 200% tokens instantly.

SOCIAL MEDIA CAMPAIGNS

We will use all leading social media platforms to spread our reach and build strong, active community and run various offers, key platforms

LEGAL STATEMENTS

LEGAL COMPLIANCE

CyCOIN is managed by CyCoin Exchange UAB, a company based in Lithuania (European Union).

All the transactions and funds are under the jurisdiction of Lithuania (European Union), where our bank accounts are based.

Forward Looking Statements

Our forecast is that, using innovative marketing strategies and intelligent placements, in about 2 years from its launch, the value of 1 unit of CyCOIN will grow by 100 times. The interest in CyCOIN will be that big, so that the coin will worth at least 600$ after 2 years.

Risks Factors

Like every crypto investment, there is a risk involved in it. But, thanks to its innovative and futuristic technology system and marketing strategies, the risk of dropping the investment value is much smaller than other cryptocurrencies.

Indemnity

Some companies of business insurance are looking forward to launch products like insurance for crypto investments, that will provide an indemnity to cover the risk of the investments, so, in the future, you can choose to pay a small insurance fee, to have your investment secured so you can have no worries about that the CyCOIN token for sale does not have the legal qualification of a security, since it does not give any rights to dividends or interests. The sale of such tokens is final and non-refundable under any circumstances whatsoever. Such tokens are not shares and do not give any right to participate to the general meeting.

CyCOIN Tokens cannot have a performance or a particular value outside our network, hence these tokens are not to be used or purchased for speculative or investment purposes. The purchaser of tokens is aware that national securities laws, which ensure that investors are sold investments that include all the proper disclosures and are subject to regulatory scrutiny for the investors' protection, are not applicable. Anyone purchasing our token expressly acknowledges and represents that she/he has carefully reviewed this CyPaper and fully understands the risks, costs and benefits associated with the purchase of the token.

General Knowledge

The purchaser of CyCOIN Token undertakes that she/he understands and has significant experience of cryptocurrencies, blockchain systems and services, and that she/he fully understands the risks associated with the crowdsale as well as

LEGAL COMPLIANCE

The mechanism related to the use of cryptocurrencies (incl. storage) in their respective geographies. CyCOIN shall not be responsible for any loss of tokens or situations making it impossible to access their tokens, like loss of passwords or any other actions which may result from any actions or omissions of the user or any person undertaking to acquire such tokens, as well as in case of hacker attacks.

Identification of our users is related to the new anti-money laundering regulations. Our company managed to keep our sign-up processes short and simple, and we have based our current user identification process on the information provided by the user himself as well as on the data collected during funds transfer transactions. We kindly ask You to read the Privacy Policy and accept the Conditions of use. After that in verification environment (in Your account) You will have to take a picture of Yourself and the front back of the document (and if necessary, a picture of You holding the document)" While such platform us CyCoin has been around for a while, it is still somewhat unregulated area in most EU countries and the future rules are still work in progress. Some of our services in the future may fall under the jurisdiction of the current European Payment Services Directive (PSD2), which means the crowdfunding platform's payment services should be licensed by the Financial Supervision Authority. countries are interpreting its contents For

instance, Lithuania is considering the operations of the "client account" to fall under the exemptions of the PSD2 directive and therefore not being subject to payment institution license.

Risks

Acquiring CyCOIN Tokens and storing them involves various risks, in particular the risk that CyCOIN may not be able to launch its operations and develop its blockchain and provide the services promised. Therefore, and prior to acquiring tokens, any user should carefully consider the risks, costs and benefits of acquiring such tokens in the context of the crowdsale and, if necessary, obtain any independent advice in this regard. Any interested person who is not in the position to accept or to understand the risks associated with the activity (incl. the risks related to the non-development of our platform, or licenses to operate) or any other risks as indicated in the Terms & Conditions of the crowdsale should NOT acquire our tokens.
